

Activity Sampling for the 21st Century.

enCircle are proud to announce the latest release of their Activity Sampling solution, "enAct". This tool provides end-to-end support for the entire Activity sampling process, from data definition and rule design, through to monitoring, notifications, and workflow. Don't make the mistake of implementing a solution that doesn't meet the true needs of Activity Sampling in today's World. Ensure the product you choose meets the following requirements:

- Desktop, Paper, Blackberry and PDA support**
- Scan ANY Paper Form (No designer required)**
- Graphical Interface for Validation Rule Design**
- Efficient PDA Forms (less than 50KB / 2sec response).**
- Instant 'Slice & Dice' of Activity Data over Intranet**
- Automated Monitoring Sheets & Notifications**
- Continuous & Stratified Sampling of Activity Data**
- Integration of Legacy Systems Providing Activity Data**

enCircle believe enAct is unique by offering the above in a single, low-cost package, with **NO hidden extras.**

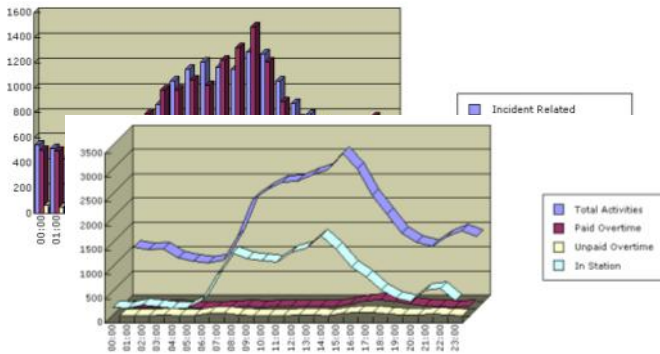

"enAct helps us manage our studies more efficiently by creating automated monitoring sheets and sending email notifications to officers. Electronic forms eliminate manual validation and free up practitioners time to concentrate on the accuracy and analysis of data. The quality of data validation has also been improved through links to our Command & Control and Duty Management systems. The software also satisfies the Audit Commissions requirements by providing an in-built audit trail."

Alan Williams,
Financial Director,
Bedfordshire Police

"enCircle have supported us closely throughout the implementation period, and also during two major campaigns. Their way of working and customer services are second to none!"

Karen Hunter,
ABC Practitioner
Bedfordshire Police
